H. B. SPECIAL

4 yr. transplants

PINUS SYLVESTRIS

Compared with Finnish Riga, our H. B. Special grew twice as fast, developed a splendid root system and was perfectly straight. For price see page 4.

HERBST BROTHERS, INC.

Agents for T. Sakata & Co., Japan

92 Warren St.

New York, N. Y.

TERMS

All sales are made subject to the terms and conditions of our printed catalog.

Disclaimer: We give for ourselves or our Principals no warranty, express or implied, as to the description, quality or productiveness, or in any other respect for the seed we deliver, nor will we be responsible for the crop in any way. In no case shall we or our Principals be held liable for more than the invoice value of the seed sold.

Payment: Our prices are calculated on a strictly cash basis; customers remitting with their orders will be allowed 5% discount.

Less than 8 ozs. furnished at an advance in price of 25%, minimum order, unless specifically provided, 4 ozs.

Seed of Oriental origin is offered for account of Messrs. T. Sakata & Co., Japan's Leading Seedsmen. As their representatives in the United States and Canada you will always find us prepared to quote and assist you in locating seed originating in the Far East.

1931

JAPANESE FLOWERING CHERRY SEED

In order to improve the stand produced from genuine imported Japanese seed, we have secured permission and will ship the 1931 crop, (ready in June/July), packed in sterilized soil in hermetically sealed tin cases. We offer the new crop as follows:

PRUNUS

	per lb.	per 10 lbs.
armeniaca sibirica, Siberian Apricot.....	\$4.00	\$35.00
incisa, Mume Cherry	3.00	27.00
japonica, Chinese Bush Berry	4.00	36.00
lannesiana, Hitoye Cherry	1.80	15.00
maacki, Amur Cherry	3.00	27.00
mume, Japanese Apricot40	3.00
serrulata, Oriental Cherry	1.80	15.00
serrulata sachalinensis, Yuma Cherry....	3.50	30.00
subhirtella, Higan Cherry	3.00	27.00

ERNEST H. WILSON in
"The Lilies of Eastern Asia"
wrote of

L. philippinense formosanum

THE finest plants I saw grew among coarse Miscanthus Grass, on a wind-swept knoll, 6,000 ft. above sea level, in Nanto prefecture. They were over 6-feet tall and had relatively broad, uniformly 5-nerved leaves. I gathered seeds and plants raised from them in the garden of Professor C. S. Sargent, Brookline, Mass., blossomed in six months from sowing but were in every respect indistinguishable from others raised from a narrow-leaf form which grew at sea level. At low altitudes in Formosa this Lily appears to flower every month in the year, the bulbs take little or no rest, but keep growing and breaking up into colonies. At higher levels, where the seasons are to be defined, the Lily conforms to them and flowers but once a year. That it should blossom in six months from seed is remarkable and shows that the Lily is markedly precocious.

DR. DAVID GRIFFITHS, of the
U. S. Dept. of Agriculture, writes us:

"Lilium philippinense formosanum is grown with us here in the open ground planted 1 in. deep. It blossoms quite profusely the 2nd year in the seed bed. It needs protection the first winter. Seed sown any time from September 1st to November or December, or in early Spring."

Some Opinions of *The Cultivated Evergreens*

"The authors of the book are experts, each in his own portion of the field, chosen by the one man whose acquaintance with all details of the subject is quite extraordinary, whom any student of anything relating to plants would be glad to serve, and who is gifted with a genius for graceful literary expression."

—*House and Garden.*

"... fortunately for us all and for the nation at large, Prof. Bailey has brought together in this comprehensive handbook the findings of a group of men whose scientific training has been supplemented by the knowledge born of practice, such men as John Dunbar, the able Assistant Superintendent of Parks at Rochester (N. Y.), Alfred Rehder of the Arnold Arboretum, and a dozen others highly qualified to speak."

—*Garden Magazine.*

"It is more than a cultural manual; it is more than a key to the species and varieties of evergreens employed (or available for use) in the horticultural beautification of the landscape—using the latter term in its broadest sense; it is more than a collection of illustrated descriptions of both broad and narrow leaved types, together with suggestions as to their adaption, protection and propagation. Rather, it is all of these, and once more the unrivalled editorial skill of Dr. Bailey has brought together and harmonized the contributions of a dozen or so expert authorities, while his no less exceptional botanical knowledge and literary charm have combined to give the book great readability and dignity . . ." —*The Florists Exchange and Horticultural Trade World.*

"Fills a long felt want well, thoroughly, attractively, practically, and with unquestionable accuracy and authority."

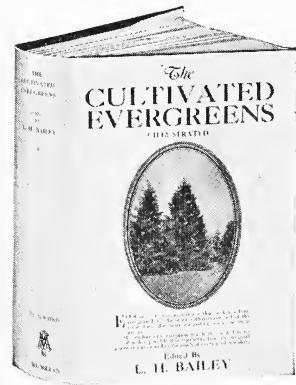

—*Florists' Exchange.*

THE CULTIVATED EVERGREENS

Edited by L. H. BAILEY

The foremost experts in the country, including Alfred Rehder, Henry Hicks, E. Bollinger, and a dozen others, each writing on the subject he knows best, help to make this the one authoritative book on evergreens. It tells:

1. *How to use conifers in a well-planned landscape.*
2. *How to plant, cultivate, and propagate them.*
- Soils, manures, and mulches; pruning; transplanting; moving large evergreens; methods of increase.
3. *Adaptation of conifers to different localities.*
4. *How to identify and handle insects, diseases, and injuries; tree surgery.*
5. *Identification of all the conifers grown in North America by means of complete keys and descriptions.*
6. *The use, planting, adaptation, and description of broadleaved evergreens.*
7. *A check-list of woody evergreens, indicating hardiness.*
8. *Complete index—more than 2,200 entries, cross-referenced.*

BOOKS

Dr. L. H. Bailey's "HORTUS" is the finest reference book published in recent years. It consolidated numerous nomenclatures into an invaluable handy reference book. Plant characteristics, propagation and care are easily found and described so clearly that even a layman understands them. We recommend this work to you. **POSTPAID \$10.00**

AZALEAS and CAMELIAS, by H. H. Hume is a brief and complete guide for planting and growing these increasingly popular broad-leaved evergreens. With illustrations in color. **POSTPAID \$1.50**

NUT GROWING, by R. J. Morris. Tells how to grow all kinds of edible nuts—hickories, pecans, walnuts, hazels, chestnuts, pines, beeches, oaks, and almonds. Especially valuable because of many illustrations and clear description of grafting methods. 30 illustrations, 256 pages. **POSTPAID \$2.50**

THE STANDARD CYCLOPEDIA OF HORTICULTURE, edited by L. H. Bailey. This is the one universal and invaluable authority on every horticultural question. Makes a compact but thorough presentation of the kinds, characteristics and methods of cultivation of the plants grown in the United States and Canada for ornament, for fancy, for fruit, and for vegetables. Formerly in 6 volumes, but now in three at about half the original price. 5,000 illustrations, 3,637 pages, 3 volumes, fabrikoid binding. **POSTPAID \$25.00**

ROCK GARDEN AND ALPINE PLANTS, by Henry Correvon. You can choose from 542 kinds of rock plants and grow them in your own garden with the information in this new book by the world's greatest authority, written specially for American conditions. 33 illustrations (17 plants in color), 560 pages. **POSTPAID \$6.00**

(Lilies) GARDEN CINDERELLAS, by Helen M. Fox. Expert information on growing lilies by a gardener whose knowledge is proven by her own success. Tells the name of every lily in cultivation, its native home, season of blooming, propagation methods, and every other detail needed for success. Beautifully illustrated in color and half-tone. 51 illustrations. 269 pages. **POSTPAID \$5.00**
